

T Cam Switches, P Motor Disconnect Switches

Tripping Characteristics

Component lifespan in relation to breaking current and utilization category ¹⁾

In order to achieve a reasonable lifespan in utilization category AC-4 (severe duty: 100 % inching, reversing or plugging) the stalled motor current should not exceed the rated current of the switch at AC-21A.

Notes

¹⁾ AC-3 and AC-21 at 400 V, AC-15 at 230 V
